

## **The HotZyme Symposium**

### ***Discovery of Extremophilic Novel Enzymes with Application for Industrial Biotechnology***

**The HotZyme Symposium is a FREE event sponsored by the HotZyme Project. The Aim of the symposium is to provide young scientists with the opportunity of interacting and networking with international high profile experts in the biotechnology field.**

Submissions of applications are invited from young scientists (age 35 years or less) on discovery, characterisation and application of extremophilic enzymes.

Applications must include short curriculum vitae that include present position, highest degree held and papers published in the last 5 years, presentation title and abstracts not exceeding 300 words. Applications for financial support for travelling will be considered.

Please submit the application materials to Haimo Gilbert via email: [haimo@eu-crf.net](mailto:haimo@eu-crf.net) by 24 November, 2014 with subject "HotZyme Symposium application + your last name". Successful applications will be notified by 22 December, 2014. Additional information including details about symposium arrangements, venue and programme will also be provided at that time to participants.

For further information, please visit the official HotZyme website: <http://hotzyme.com/>
