A HotZyme Project Sponsored Training Event

**Training The Next Generation of Scientists in Enzyme Screening
and Characterisation From Novel Thermophilic Genomes and
Metagenomes**

Tuesday, May 27, 2-6pm

The HotZyme Training Café is your opportunity to **Learn** about latest scientific discoveries in enzyme screening and characterisation; **Connect** with top academics, their research teams and industrial employers; and **Gain** interest for the HotZyme project and a career in enzyme discoveries and applications.

The sponsor of this event is the HotZyme project - a large-scale research project supported by the FP7 of the EU, with aims to identify such enzymes from hot terrestrial environments, using metagenomic-screening methods. The consortium is composed of 13 partners with strong expertise in Microbiology, Biochemistry, and Industrial Biotechnology.

2-6 p.m. on Tuesday, May 27 2014
Geoffrey Pope,
Biosciences, GP328,
University of Exeter, UK

This is a free event.
